

EQUIPMENT & SYSTEMS FOR INDUSTRY, INC. (ESI) is pleased to announce that it is now a distributor of MASABA MINING EQUIPMENT products.

MASABA is a leading national supplier of portable chassis and structural steel components for the aggregate processing industry. Additionally, they supply both custom and stocked conveyors and conveyor systems from a simple radial stacker to a multimillion dollar material handling system. They are also the manufacturers of the MAGNUM Telescopic Radial Stacking Conveyor, have all kinds of wash plants, bins, hoppers, and engineered systems to meet all needs.

The MASABA history started in 1939 when Harold Higman, Sr. founded Higman Sand & Gravel. From there, Harold Higman, Jr. formed MASABA MINING EQUIPMENT in 1962, taking what he learned from his father and combining it with his knowledge of building quality, tough equipment.
